muzzle brake which projected far beyond the nose and had an outside diameter of about 140 rm. The tank mounted no AA weapons. The second type was smaller than the first type. It had five large bogie wheels per side, no tracksupporting rollers, a wedge-shaped nose, a driver's hatch in the left for ward section, a revolving turret with rounded-off edges without a commander to cupola, and a gun without muzzle brake. No AA gun was observed. (4) From 20 to 22 tanks of both types participated in the troop review held in Foznan on 1 May 1950. The number of the heavy tanks slightly exceeded that of the light ones. During exercises hold by this unit at the Biedrusko (P 53/X 27) troop training grounds, not more than about 15 tanks of the two types were observed. No special-purpose tanks, wrecker vehicles, or flatbed trailers were observed with the troops in Foznan or during field exercises at Biodrusko. Source stated that the tank unit had a "great number" of trucks, include: American Studebakers and Soviet trucks. No German vehicles were seen. At regulat intervals, the tank unit moved to the Biedruske troop training crounds, going via Oborniki and the area north of Piatkowo. march discipline was good and the drivers were skilled in cross-country driving. Breakdowns of tanks were seldom observed. At the training grounds the tanks were observed moving in a staggered formation. Training in firing was frequently observed. Source did not observe that the tank unit practiced together with troops of other branches of service. Then practicing separately, the heavy tanks numbered six or seven. In spite of frequent political indoctrination, not all the tank troops were Communists. Hanv soldiers attended Catholic Mass services on Sundays. 50X1-HUM

3. A barracks installation of one multi-story red brick building, about 15x20 meters, is located on ul. Slowackiego, about 500 to 700 meters from the circuit around the urban district of Jezyce and near the botanic garden of the city. The installation was occupied by about 250 troops who were 22 to 25 years old. The soldiers were gray-blue uniforms, dark-blue triangular collar patches, and a dark-blue ribbon around their blue service caps. Only small arms, mostly submachine guns with drum and clip magazines, were carried by the troops. (5)

RKU (Recruiting Office) in Poznan.

4. The RKU was located on ul. Slowackiego, opposite the barracks installation described in paragraph 3. Draftees from the entire district of Poznan had to report to the office for registration.

UB (Security Police) Installations in Poznan.

- 5. The UE offices were located in a compound which contained several groups of buildings on both sides of UL. Kochanowskiego and north of UL. Dabrowskiego. The compound was surrounded by a board fence, two meters high. The main entrance was located on uL. Kochanowskiego. One group of buildings fronting on uL. Dabrowskiego, uL. Mickiewicza, uL. Krasninskiego, and uL. Kochanowskiego, consists of two two-story administration buildings, each about 50 x 11 meters, one wooden conference building about 30 x 8 meters, two wooden storehouses, and one brick building housing a commissary. A second group of buildings fronting on Krasinskiego on the south and Kochanowskiego on the east includes a three-story administration building, about 25x10 meters, a stable with about 10 horses, and a parking lot for motor vehicles. A third group of buildings on the west side of uL. Kochanowskiego, opposite uL. Krasninskiego, includes a prison in its southern section and the prison kitchen and some more installations in its northern section.
- 6. The UB laundry serving UE personnel quartered in barracks was located on the south side of ul. Poznanska. The washing of an MCO school was frequently taken to this laundry.

SECRET-CONTROL US OFFICIALS ONLY

		1
	SECRET-COPTROL/US OFFICIALS ONLY 3	50X1
7.	Prior to August 1919 UB personnel wore gray-green uniforms with epaulets to match, triangular red collar patches, and round caps with a red ribbon. The chief of the UB office wore civilian clothes at all times. Except for sentries who were armed with rifles, all UB personnel carried pistols. Some of the UB personnel were billeted in the offices, while others went home after duty hours. service with the UB was voluntary acknowledged as active military duty. In general, UB personnel were 20 to 3 years old. (6)	50X1-HUM and 0
	Comments. 50	DX1-HUM
(1)	reported to be stationed between the Biedrusko troop training grounds and Poznan. since Piatkowo is located on the way from Poznan to	,
	Beidrusko. A similar detachment was also observed in Kutno.	50X1-HUM
(2)	Tank units have been repeatedly reported to be quartered in this barracks installation. According to one report, a tank training center and a tank officer candidate school are located there. Other	
	reported a 3d or 5th Tank Regt there. A tank division, to which	[.] 50X1-HUM
(3)	the unit might have belonged, has not been identified. Troops of all army units serve only two years. In the summer of 1950, the	
	1927 and 1928 classes were in active service.	;
4)	The description of the heavy tank corresponds to that of the Soviet JS-1 tank which, in contrast to the JS-2 and JS-3 models, does not mount an AA	
	machine gun. The smaller tanks were T-3ks.	
.5)	The pinnoint location of the barracks installation cannot be identified in the Poznan city plan. The blue uniforms indicate an MO (Militia) unit.	
6)	It is fairly definitely believed that UB (Security Police) personnel no	
	longer wear red collar patches and red cap ribbons. They probably wear	
	black insignia now.
